### 2.1.1. Description

Submit a previously setup payment

#### 2.1.2. Parameters

Туре	Name	Description	Schema
Header	<b>authorization</b> required	An Authorisation Token as per https://tools.ietf.org/html/rfc6750	string
Header	x-fapi- customer-ip- address optional	The PSU's IP address if the PSU is currently logged in with the TPP.	string
Header	x-fapi- customer-last- logged-time optional	The time when the PSU last logged in with the TPP.	string
Header	x-fapi- financial-id required	The unique id of the ASPSP to which the request is issued. The unique id will be issued by OB.	string
Header	x-fapi- interaction-id optional	An RFC4122 UID used as a correlation id.	string
Header	x- idempotency- key required	Every request will be processed only once per x-idempotency-key. The Idempotency Key will be valid for 24 hours.	string
Header	x-jws- signature required	Header containing a detached JWS signature of the body of the payload.	string

### 2.1.3. Body parameter

Setup a single immediate payment

Name: body Flags: required

Name	Schema
<b>Data</b> required	PaymentSubmission

Name	Schema
Risk	Risk
required	RISK

## **PaymentSubmission**

Name	Description	Schema
<b>Initiation</b> required	The Initiation payload is sent by the initiating party to the ASPSP. It is used to request movement of funds from the debtor account to a creditor.	Initiation
PaymentId required	OB: Unique identification as assigned by the ASPSP to uniquely identify the payment setup resource. <b>Length</b> : 1 - 128	string

#### **Initiation**

Name	Description	Schema
CreditorAccou nt required	Unambiguous identification of the account of the creditor to which a credit entry will be posted as a result of the payment transaction.	CreditorAccount
<b>CreditorAgent</b> required	Financial institution servicing an account for the creditor.	CreditorAgent
<b>DebtorAccoun</b> <b>t</b> optional	Unambiguous identification of the account of the debtor to which a debit entry will be made as a result of the transaction.	DebtorAccount
<b>DebtorAgent</b> optional	Financial institution servicing an account for the debtor.	DebtorAgent
EndToEndIde ntification required	Unique identification assigned by the initiating party to unambiguously identify the transaction. This identification is passed on, unchanged, throughout the entire end-to-end chain. Usage: The end-to-end identification can be used for reconciliation or to link tasks relating to the transaction. It can be included in several messages related to the transaction. OB: The Faster Payments Scheme can only access 31 characters for the EndToEndIdentification field.  Length: 1 - 35	string
InstructedAm ount required	Amount of money to be moved between the debtor and creditor, before deduction of charges, expressed in the currency as ordered by the initiating party. Usage: This amount has to be transported unchanged through the transaction chain.	InstructedAmount

Name	Description	Schema
InstructionIde ntification required	Unique identification as assigned by an instructing party for an instructed party to unambiguously identify the instruction. Usage: the instruction identification is a point to point reference that can be used between the instructing party and the instructed party to refer to the individual instruction. It can be included in several messages related to the instruction.  Length: 1 - 35	string
RemittanceInf ormation optional	Information supplied to enable the matching of an entry with the items that the transfer is intended to settle, such as commercial invoices in an accounts' receivable system.	RemittanceInformati on

#### CreditorAccount

Name	Description	Schema
<b>Identification</b> required	Identification assigned by an institution to identify an account. This identification is known by the account owner.  Length: 1 - 34	string
Name required	Name of the account, as assigned by the account servicing institution, in agreement with the account owner in order to provide an additional means of identification of the account. Usage: The account name is different from the account owner name. The account name is used in certain user communities to provide a means of identifying the account, in addition to the account owner's identity and the account number. ASPSPs may carry out name validation for Confirmation of Payee, but it is not mandatory.  Length: 1 - 70	string
SchemeName required	Name of the identification scheme, in a coded form as published in an external list.	enum (BBAN, IBAN)
SecondaryIde ntification optional	Identification assigned by an institution to identify an account. This identification is known by the account owner. <b>Length</b> : 1 - 34	string

### CreditorAgent

Name	Description	Schema
<b>Identification</b> required	Unique and unambiguous identification of a person. <b>Length</b> : 1 - 35	string
SchemeName required	Name of the identification scheme, in a coded form as published in an external list.	enum (BICFI, UKSortCode)

#### DebtorAccount

Name	Description	Schema
<b>Identification</b> required	Identification assigned by an institution to identify an account. This identification is known by the account owner. <b>Length</b> : 1 - 34	string
Name optional	Name of the account, as assigned by the account servicing institution, in agreement with the account owner in order to provide an additional means of identification of the account. Usage: The account name is different from the account owner name. The account name is used in certain user communities to provide a means of identifying the account, in addition to the account owner's identity and the account number.  Length: 1 - 70	string
<b>SchemeName</b> required	Name of the identification scheme, in a coded form as published in an external list.	enum (BBAN, IBAN)
SecondaryIde ntification optional	Identification assigned by an institution to identify an account. This identification is known by the account owner. <b>Length</b> : 1 - 34	string

# DebtorAgent

Name	Description	Schema
<b>Identification</b> required	Unique and unambiguous identification of a person. <b>Length</b> : 1 - 35	string
SchemeName required	Name of the identification scheme, in a coded form as published in an external list.	enum (BICFI, UKSortCode)

#### Instructed Amount

Name	Description	Schema
Amount required	<b>Pattern</b> : "^-?\\d{1,13}\\.\\d{1,5}\$"	string
<b>Currency</b> required	A code allocated to a currency by a Maintenance Agency under an international identification scheme, as described in the latest edition of the international standard ISO 4217 - Codes for the representation of currencies and funds.  Pattern: "^[A-Z]{3}\$"	string

### RemittanceInformation

Name	Description	Schema
<b>Reference</b> optional	Unique reference, as assigned by the creditor, to unambiguously refer to the payment transaction. Usage: If available, the initiating party should provide this reference in the structured remittance information, to enable reconciliation by the creditor upon receipt of the amount of money. If the business context requires the use of a creditor reference or a payment remit identification, and only one identifier can be passed through the end-to-end chain, the creditor's reference or payment remittance identification should be quoted in the end-to-end transaction identification. OB: The Faster Payments Scheme can only accept 18 characters for the ReferenceInformation field which is where this ISO field will be mapped.  Length: 1 - 35	string
<b>Unstructured</b> optional	Information supplied to enable the matching/reconciliation of an entry with the items that the payment is intended to settle, such as commercial invoices in an accounts' receivable system, in an unstructured form.  Length: 1 - 140	string

#### Risk

Name	Description	Schema
DeliveryAddr ess optional	Information that locates and identifies a specific address, as defined by postal services or in free format text.	DeliveryAddress
MerchantCate goryCode optional	Category code conforms to ISO 18245, related to the type of services or goods the merchant provides for the transaction <b>Length</b> : 3 - 4	string
MerchantCust omerIdentific ation optional	The unique customer identifier of the PSU with the merchant.  Length: 1 - 70	string
PaymentConte xtCode optional	Specifies the payment context	enum (BillPayment, EcommerceGoods, EcommerceServices, Other, PersonToPerson)

## DeliveryAddress

Name	Description	Schema
AddressLine optional	Information that locates and identifies a specific address, as defined by postal services, that is presented in free format text.	< string > array

Name	Description	Schema
BuildingNumb er optional	Number that identifies the position of a building on a street. <b>Length</b> : 1 - 16	string
<b>Country</b> required	Nation with its own government, occupying a particular territory.  Pattern: "^[A-Z]{2}\$"	string
CountrySubDi vision optional	Identifies a subdivision of a country, for instance state, region, county.	< string > array
PostCode optional	Identifier consisting of a group of letters and/or numbers that is added to a postal address to assist the sorting of mail <b>Length</b> : 1 - 16	string
StreetName optional	Name of a street or thoroughfare  Length: 1 - 70	string
TownName required	Name of a built-up area, with defined boundaries, and a local government.  Length: 1 - 35	string

# 2.1.4. Responses

HTTP Code	Description	Schema
201	Payment submit resource successfully created  Headers:  x-jws-signature (string): Header containing a detached JWS signature of the body of the payload.  x-fapi-interaction-id (string): An RFC4122 UID used as a correlation id.	Payment Submit POST 201 Response

### 2.3.3. Body parameter

Setup a single immediate payment

Name: body Flags: required

Name	Schema
<b>Data</b> required	PaymentSetup

Name	Schema
Risk	Risk
required	RISK

### **PaymentSetup**

Name	Schema
Initiation required	Initiation

### Initiation

Name	Description	Schema
CreditorAccou nt required	Unambiguous identification of the account of the creditor to which a credit entry will be posted as a result of the payment transaction.	CreditorAccount
<b>CreditorAgent</b> required	Financial institution servicing an account for the creditor.	CreditorAgent
DebtorAccoun t optional	Unambiguous identification of the account of the debtor to which a debit entry will be made as a result of the transaction.	DebtorAccount
<b>DebtorAgent</b> optional	Financial institution servicing an account for the debtor.	DebtorAgent
EndToEndIde ntification required	Unique identification assigned by the initiating party to unambiguously identify the transaction. This identification is passed on, unchanged, throughout the entire end-to-end chain. Usage: The end-to-end identification can be used for reconciliation or to link tasks relating to the transaction. It can be included in several messages related to the transaction. OB: The Faster Payments Scheme can only access 31 characters for the EndToEndIdentification field.  Length: 1 - 35	string
InstructedAm ount required	Amount of money to be moved between the debtor and creditor, before deduction of charges, expressed in the currency as ordered by the initiating party. Usage: This amount has to be transported unchanged through the transaction chain.	InstructedAmount
InstructionIde ntification required	Unique identification as assigned by an instructing party for an instructed party to unambiguously identify the instruction. Usage: the instruction identification is a point to point reference that can be used between the instructing party and the instructed party to refer to the individual instruction. It can be included in several messages related to the instruction.  Length: 1 - 35	string
RemittanceInf ormation optional	Information supplied to enable the matching of an entry with the items that the transfer is intended to settle, such as commercial invoices in an accounts' receivable system.	RemittanceInformati on

#### CreditorAccount

Name	Description	Schema
<b>Identification</b> required	Identification assigned by an institution to identify an account. This identification is known by the account owner. <b>Length</b> : 1 - 34	string
Name required	Name of the account, as assigned by the account servicing institution, in agreement with the account owner in order to provide an additional means of identification of the account. Usage: The account name is different from the account owner name. The account name is used in certain user communities to provide a means of identifying the account, in addition to the account owner's identity and the account number. ASPSPs may carry out name validation for Confirmation of Payee, but it is not mandatory.  Length: 1 - 70	string
SchemeName required	Name of the identification scheme, in a coded form as published in an external list.	enum (BBAN, IBAN)
SecondaryIde ntification optional	Identification assigned by an institution to identify an account. This identification is known by the account owner.  Length: 1 - 34	string

### CreditorAgent

Name	Description	Schema
<b>Identification</b> required	Unique and unambiguous identification of a person. <b>Length</b> : 1 - 35	string
SchemeName required	Name of the identification scheme, in a coded form as published in an external list.	enum (BICFI, UKSortCode)

#### **DebtorAccount**

Name	Description	Schema
<b>Identification</b> required	Identification assigned by an institution to identify an account. This identification is known by the account owner. <b>Length</b> : 1 - 34	string
Name optional	Name of the account, as assigned by the account servicing institution, in agreement with the account owner in order to provide an additional means of identification of the account. Usage: The account name is different from the account owner name. The account name is used in certain user communities to provide a means of identifying the account, in addition to the account owner's identity and the account number.  Length: 1 - 70	string
SchemeName required	Name of the identification scheme, in a coded form as published in an external list.	enum (BBAN, IBAN)

Name	Description	Schema
SecondaryIde ntification optional	Identification assigned by an institution to identify an account. This identification is known by the account owner.  Length: 1 - 34	string

#### DebtorAgent

Name	Description	Schema
<b>Identification</b> required	Unique and unambiguous identification of a person. <b>Length</b> : 1 - 35	string
SchemeName required	Name of the identification scheme, in a coded form as published in an external list.	enum (BICFI, UKSortCode)

#### Instructed Amount

Name	Description	Schema
Amount required	<b>Pattern</b> : "^-?\\d{1,13}\\.\\d{1,5}\$"	string
<b>Currency</b> required	A code allocated to a currency by a Maintenance Agency under an international identification scheme, as described in the latest edition of the international standard ISO 4217 - Codes for the representation of currencies and funds.  Pattern: "^[A-Z]{3}\$"	string

### RemittanceInformation

Name	Description	Schema
<b>Reference</b> optional	Unique reference, as assigned by the creditor, to unambiguously refer to the payment transaction. Usage: If available, the initiating party should provide this reference in the structured remittance information, to enable reconciliation by the creditor upon receipt of the amount of money. If the business context requires the use of a creditor reference or a payment remit identification, and only one identifier can be passed through the end-to-end chain, the creditor's reference or payment remittance identification should be quoted in the end-to-end transaction identification. OB: The Faster Payments Scheme can only accept 18 characters for the ReferenceInformation field which is where this ISO field will be mapped.  Length: 1 - 35	string
<b>Unstructured</b> optional	Information supplied to enable the matching/reconciliation of an entry with the items that the payment is intended to settle, such as commercial invoices in an accounts' receivable system, in an unstructured form.  Length: 1 - 140	string

#### Risk

Name	Description	Schema
DeliveryAddr ess optional	Information that locates and identifies a specific address, as defined by postal services or in free format text.	DeliveryAddress
MerchantCate goryCode optional	Category code conforms to ISO 18245, related to the type of services or goods the merchant provides for the transaction <b>Length</b> : 3 - 4	string
MerchantCust omerIdentific ation optional	The unique customer identifier of the PSU with the merchant.  Length: 1 - 70	string
PaymentConte xtCode optional	Specifies the payment context	enum (BillPayment, EcommerceGoods, EcommerceServices, Other, PersonToPerson)

## DeliveryAddress

Name	Description	Schema
AddressLine optional	Information that locates and identifies a specific address, as defined by postal services, that is presented in free format text.	< string > array
BuildingNumb er optional	Number that identifies the position of a building on a street. <b>Length</b> : 1 - 16	string
<b>Country</b> required	Nation with its own government, occupying a particular territory.  Pattern: "^[A-Z]{2}\$"	string
CountrySubDi vision optional	Identifies a subdivision of a country, for instance state, region, county.	< string > array
PostCode optional	Identifier consisting of a group of letters and/or numbers that is added to a postal address to assist the sorting of mail <b>Length</b> : 1 - 16	string
StreetName optional	Name of a street or thoroughfare <b>Length</b> : 1 - 70	string
TownName required	Name of a built-up area, with defined boundaries, and a local government.  Length: 1 - 35	string

# 2.3.4. Responses

HTTP Code	Description	Schema
201	Payment setup resource successfully created  Headers:  x-jws-signature (string): Header containing a detached JWS signature of the body of the payload.  x-fapi-interaction-id (string): An RFC4122 UID used as a correlation id.	Payment setup POST response

#### RemittanceInformation

Name	Description	Schema
<b>Reference</b> optional	Unique reference, as assigned by the creditor, to unambiguously refer to the payment transaction. Usage: If available, the initiating party should provide this reference in the structured remittance information, to enable reconciliation by the creditor upon receipt of the amount of money. If the business context requires the use of a creditor reference or a payment remit identification, and only one identifier can be passed through the end-to-end chain, the creditor's reference or payment remittance identification should be quoted in the end-to-end transaction identification. OB: The Faster Payments Scheme can only accept 18 characters for the ReferenceInformation field - which is where this ISO field will be mapped.  Length: 1 - 35	string
<b>Unstructured</b> optional	Information supplied to enable the matching/reconciliation of an entry with the items that the payment is intended to settle, such as commercial invoices in an accounts' receivable system, in an unstructured form.  Length: 1 - 140	string

### Risk

Name	Description	Schema
DeliveryAddr ess optional	Information that locates and identifies a specific address, as defined by postal services or in free format text.	DeliveryAddress
MerchantCate goryCode optional	Category code conforms to ISO 18245, related to the type of services or goods the merchant provides for the transaction <b>Length</b> : 3 - 4	string
MerchantCust omerIdentific ation optional	The unique customer identifier of the PSU with the merchant.  Length: 1 - 70	string
PaymentConte xtCode optional	Specifies the payment context	enum (BillPayment, EcommerceGoods, EcommerceServices, Other, PersonToPerson)

### DeliveryAddress

Name	Description	Schema
AddressLine optional	Information that locates and identifies a specific address, as defined by postal services, that is presented in free format text.	< string > array
BuildingNumb er optional	Number that identifies the position of a building on a street.  Length: 1 - 16	string

Name	Description	Schema
<b>Country</b> required	Nation with its own government, occupying a particular territory.  Pattern: "^[A-Z]{2}\$"	string
CountrySubDi vision optional	Identifies a subdivision of a country, for instance state, region, county.	< string > array
PostCode optional	Identifier consisting of a group of letters and/or numbers that is added to a postal address to assist the sorting of mail <b>Length</b> : 1 - 16	string
StreetName optional	Name of a street or thoroughfare <b>Length</b> : 1 - 70	string
TownName required	Name of a built-up area, with defined boundaries, and a local government.  Length: 1 - 35	string

# 2.4. Get a single immediate payment

GET /payments/{PaymentId}

### 2.4.1. Description

Get a single immediate payment

### 2.4.2. Parameters

Туре	Name	Description	Schema
Header	<b>authorization</b> required	An Authorisation Token as per https://tools.ietf.org/html/rfc6750	string
Header	x-fapi- customer-ip- address optional	The PSU's IP address if the PSU is currently logged in with the TPP.	string
Header	x-fapi- customer-last- logged-time optional	The time when the PSU last logged in with the TPP.	string
Header	x-fapi- financial-id required	The unique id of the ASPSP to which the request is issued. The unique id will be issued by OB.	string
Header	x-fapi- interaction-id optional	An RFC4122 UID used as a correlation id.	string
Path	PaymentId required	Unique identification as assigned by the ASPSP to uniquely identify the payment setup resource.	string

### 2.4.3. Responses

HTTP Code	Description	Schema
200	Payment resource successfully retrieved  Headers:  x-jws-signature (string): Header containing a detached JWS signature of the body of the payload.  x-fapi-interaction-id (string): An RFC4122 UID used as a correlation id.	Payment setup GET response
400	Bad Request	No Content
401	Unauthorized	No Content
403	Forbidden	No Content
405	Method Not Allowed	No Content

HTTP Code	Description	Schema
406	Not Acceptable	No Content
429	Too Many Requests	No Content
500	Internal Server Error	No Content

## Payment setup GET response

Name	Description	Schema
<b>Data</b> required	Reflection of The Main Data Payload, with Created Resource ID, Status and Timestamp	PaymentSetupRespo nse
<b>Links</b> required	Link URIs relevant to the payload	Links
<b>Meta</b> required	Meta Data Relevant to the payload	Meta
<b>Risk</b> required	Reflection of POSTed Risk profile	Risk

## PaymentSetupResponse

Name	Description	Schema
CreationDateT ime required	Date and time at which the resource was created.	string (date-time)
<b>Initiation</b> required	The Initiation payload is sent by the initiating party to the ASPSP. It is used to request movement of funds from the debtor account to a creditor.	Initiation
PaymentId required	OB: Unique identification as assigned by the ASPSP to uniquely identify the payment setup resource.  Length: 1 - 128	string
<b>Status</b> optional	Specifies the status of the payment resource.	enum (AcceptedCustomerP rofile, AcceptedTechnicalV alidation, Pending, Rejected)

### Initiation

Name	Description	Schema
CreditorAccou nt required	Unambiguous identification of the account of the creditor to which a credit entry will be posted as a result of the payment transaction.	CreditorAccount
CreditorAgent required	Financial institution servicing an account for the creditor.	CreditorAgent

Name	Description	Schema
DebtorAccoun t optional	Unambiguous identification of the account of the debtor to which a debit entry will be made as a result of the transaction.	DebtorAccount
<b>DebtorAgent</b> optional	Financial institution servicing an account for the debtor.	DebtorAgent
EndToEndIde ntification required	Unique identification assigned by the initiating party to unambiguously identify the transaction. This identification is passed on, unchanged, throughout the entire end-to-end chain. Usage: The end-to-end identification can be used for reconciliation or to link tasks relating to the transaction. It can be included in several messages related to the transaction. OB: The Faster Payments Scheme can only access 31 characters for the EndToEndIdentification field.  Length: 1 - 35	string
InstructedAm ount required	Amount of money to be moved between the debtor and creditor, before deduction of charges, expressed in the currency as ordered by the initiating party. Usage: This amount has to be transported unchanged through the transaction chain.	InstructedAmount
InstructionIde ntification required	Unique identification as assigned by an instructing party for an instructed party to unambiguously identify the instruction. Usage: the instruction identification is a point to point reference that can be used between the instructing party and the instructed party to refer to the individual instruction. It can be included in several messages related to the instruction.  Length: 1 - 35	string
RemittanceInf ormation optional	Information supplied to enable the matching of an entry with the items that the transfer is intended to settle, such as commercial invoices in an accounts' receivable system.	RemittanceInformati on

#### CreditorAccount

Name	Description	Schema
<b>Identification</b> required	Identification assigned by an institution to identify an account. This identification is known by the account owner.  Length: 1 - 34	string
<b>Name</b> required	Name of the account, as assigned by the account servicing institution, in agreement with the account owner in order to provide an additional means of identification of the account. Usage: The account name is different from the account owner name. The account name is used in certain user communities to provide a means of identifying the account, in addition to the account owner's identity and the account number. ASPSPs may carry out name validation for Confirmation of Payee, but it is not mandatory.  Length: 1 - 70	string

Name	Description	Schema
SchemeName required	Name of the identification scheme, in a coded form as published in an external list.	enum (BBAN, IBAN)
SecondaryIde ntification optional	Identification assigned by an institution to identify an account. This identification is known by the account owner.  Length: 1 - 34	string

### CreditorAgent

Name	Description	Schema
<b>Identification</b> required	Unique and unambiguous identification of a person. <b>Length</b> : 1 - 35	string
SchemeName required	Name of the identification scheme, in a coded form as published in an external list.	enum (BICFI, UKSortCode)

#### DebtorAccount

Name	Description	Schema
<b>Identification</b> required	Identification assigned by an institution to identify an account. This identification is known by the account owner. <b>Length</b> : 1 - 34	string
Name optional	Name of the account, as assigned by the account servicing institution, in agreement with the account owner in order to provide an additional means of identification of the account. Usage: The account name is different from the account owner name. The account name is used in certain user communities to provide a means of identifying the account, in addition to the account owner's identity and the account number.  Length: 1 - 70	string
SchemeName required	Name of the identification scheme, in a coded form as published in an external list.	enum (BBAN, IBAN)
SecondaryIde ntification optional	Identification assigned by an institution to identify an account. This identification is known by the account owner. <b>Length</b> : 1 - 34	string

# DebtorAgent

Name	Description	Schema
<b>Identification</b> required	Unique and unambiguous identification of a person. <b>Length</b> : 1 - 35	string
SchemeName required	Name of the identification scheme, in a coded form as published in an external list.	enum (BICFI, UKSortCode)

#### Instructed Amount

Name	Description	Schema
Amount required	<b>Pattern</b> : "^-?\\d{1,13}\\.\\d{1,5}\$"	string
<b>Currency</b> required	A code allocated to a currency by a Maintenance Agency under an international identification scheme, as described in the latest edition of the international standard ISO 4217 - Codes for the representation of currencies and funds.  Pattern: "^[A-Z]{3}\$"	string

#### RemittanceInformation

Name	Description	Schema
<b>Reference</b> optional	Unique reference, as assigned by the creditor, to unambiguously refer to the payment transaction. Usage: If available, the initiating party should provide this reference in the structured remittance information, to enable reconciliation by the creditor upon receipt of the amount of money. If the business context requires the use of a creditor reference or a payment remit identification, and only one identifier can be passed through the end-to-end chain, the creditor's reference or payment remittance identification should be quoted in the end-to-end transaction identification.
