Submit a previously setup payment

# 2.1.2. Body parameter

Setup a single immediate payment

Name: body Flags: required

Name	Description	Schema
CreditorAccou nt required	Unambiguous identification of the account of the creditor to which a credit entry will be posted as a result of the payment transaction.	CreditorAccount
<b>CreditorAgent</b> required	Financial institution servicing an account for the creditor.	CreditorAgent
DebtorAccoun t optional	Unambiguous identification of the account of the debtor to which a debit entry will be made as a result of the transaction.	DebtorAccount
<b>DebtorAgent</b> optional	Financial institution servicing an account for the debtor.	DebtorAgent
EndToEndIde ntification required	Unique identification assigned by the initiating party to unambiguously identify the transaction. This identification is passed on, unchanged, throughout the entire end-to-end chain. Usage: The end-to-end identification can be used for reconciliation or to link tasks relating to the transaction. It can be included in several messages related to the transaction.  Length: 1 - 35	string
InstructedAm ount required	Amount of money to be moved between the debtor and creditor, before deduction of charges, expressed in the currency as ordered by the initiating party. Usage: This amount has to be transported unchanged through the transaction chain.	InstructedAmount
InstructionIde ntification required	Unique identification as assigned by an instructing party for an instructed party to unambiguously identify the instruction. Usage: the instruction identification is a point to point reference that can be used between the instructing party and the instructed party to refer to the individual instruction. It can be included in several messages related to the instruction.  Length: 1 - 35	string

Name	Description	Schema
MerchantCate goryCode optional	Category code conform to ISO 18245, related to the type of services or goods the merchant provides for the transaction.  Length: 3 - 4	string
PaymentId required	Unique identification as assigned by the ASPSP to uniquely identify the payment setup resource.  Length: 1 - 35	string
RemittanceInf ormation optional	Information supplied to enable the matching/reconciliation of an entry with the items that the payment is intended to settle, such as commercial invoices in an accounts' receivable system, in an unstructured form.	RemittanceInformati on

### CreditorAccount

Name	Description	Schema
<b>Identification</b> required	maxLength 34 text <b>Length</b> : 1 - 34	string
Name required	maxLength 70 text  Length: 1 - 70	string
SchemeName required	Name of the identification scheme, in a coded form as published in an external list.	enum (BBAN)

# CreditorAgent

Name	Description	Schema
<b>Identification</b> required	United Kingdom (UK) Sort Code - identifies British financial institutions on the British national clearing systems. The sort code is assigned by the Association for Payments and Clearing Services (APACS).  Pattern: "^SC[0-9]{6,6}\$"	string
SchemeName required	Specifies the external financial institution identification scheme name code in the format of character string.	enum (UKSortCode)

### **DebtorAccount**

Name	Description	Schema
<b>Identification</b> required	maxLength 34 text <b>Length</b> : 1 - 34	string
Name optional	maxLength 70 text  Length: 1 - 70	string
SchemeName required	Name of the identification scheme, in a coded form as published in an external list.	enum (BBAN)

# DebtorAgent

Name	Description	Schema
<b>Identification</b> required	United Kingdom (UK) Sort Code - identifies British financial institutions on the British national clearing systems. The sort code is assigned by the Association for Payments and Clearing Services (APACS).  Pattern: "^SC[0-9]{6,6}\$"	string
SchemeName required	Specifies the external financial institution identification scheme name code in the format of character string.	enum (UKSortCode)

### InstructedAmount

Name	Description	Schema
<b>Amount</b> required	<b>Pattern</b> : "^-?\\d{1,13}\\.\\d{1,5}\$"	string
<b>Currency</b> required	A code allocated to a currency by a Maintenance Agency under an international identification scheme, as described in the latest edition of the international standard ISO 4217 'Codes for the representation of currencies and funds'  Pattern: "^[A-Z]{3}\$"	string

### RemittanceInformation

Name	Description	Schema
	Unique reference, as assigned by the creditor, to unambiguously refer to the payment transaction. Usage: If available, the initiating party should provide this reference in the structured remittance information, to enable reconciliation by the creditor upon receipt of the amount of money. If the business context requires the use of a creditor reference or a payment remit identification, and only one identifier can be passed through the end-to-end chain, the creditor's reference or payment remittance identification should be quoted in the end-to-end transaction identification.  Length: 1 - 35	
<b>Unstructured</b> optional	Information supplied to enable the matching/reconciliation of an entry with the items that the payment is intended to settle, such as commercial invoices in an accounts' receivable system, in an unstructured form.  Length: 1 - 140	string

# 2.1.3. Responses
